

RootSystem::IDisposable

Helper::INativeWrapper

Windows.Kinect.InfraredFrame

```
graph BT; A[Windows.Kinect.InfraredFrame] --> B[RootSystem::IDisposable]; A --> C[Helper::INativeWrapper];
```

The diagram illustrates the implementation of two interfaces by a single class. At the bottom, a gray box labeled 'Windows.Kinect.InfraredFrame' has two blue arrows pointing upwards. One arrow points to a white box labeled 'RootSystem::IDisposable' on the left, and the other points to a white box labeled 'Helper::INativeWrapper' on the right. This indicates that 'Windows.Kinect.InfraredFrame' implements both 'RootSystem::IDisposable' and 'Helper::INativeWrapper'.
